

# Company Profile

---

Since its founding in 1974 Indian Rubber Products has become a leading supplier of custom-made rubber products.

By constantly introducing innovative manufacturing techniques and product designs we are able to provide a wide range of highly engineered rubber products for specialized and demanding applications. Our customers include original equipments manufacturers of industrial and domestic equipment as well as the automotive, defence, power generation and pharmaceutical industries.

As our customer base has increased we have widened our product offerings to meet a wide range of industrial applications.

We are able to supply high-quality components for mega-capacity turbines and generators, rubber-to-metal-bonded products, high-precision moldings, and anti-vibration systems for the railroad industry. Over three decades Indian Rubber Products has enhanced its manufacturing capacity using a wide range of polymer technology including EPDM, Neoprene, NBR, fluoroelastomer, Silicone, modified silicone rubber as well as polyurethane, Teflon and PVC/NBR blends.

The results? We have the capacity, technology, and expertise to fulfill all the polymer requirements.

# Quality Policy

---

Total Quality Management" (TQM) is our motto and our core Philosophy. We are committed to complete customer satisfaction.

Every member of our technical team is dedicated to constant upgrading of and the highest quality of our products and services.

Attainment of work excellence and delighted customer is the objective of the company.

## Quality Control

---

The worldwide success of our products comes from meeting and exceeding our customer's expectations.

Not only do the quality standards of our products meet the expectations of our customers but due to the efficiency of our firm's dynamic management team we resolve the needs of our customers in real time.

Our TQM systems form the basis of our work ethic.

Proactive preventative methodology is incorporated into our processing of incoming raw material, outsourcing components, and in-process production controls.

Our quality assurance procedures are regularly assessed to recognized international standards by various competent bodies.

Quality leadership means cultivation of customer loyalty achieved by delivering quality products and services at optimum cost and in a timely fashion to fulfill the expectations of our customers.

# Group Activities

---

In 1954, a lawyer's son heaving a great vision with limited resources diversified his automobile and petroleum trade and formed Automotive Products Company in his garage to manufacture car polishes and Brake Fluids. Today the vision of our founder Mr. B.M.L. Khandelwal has taken shape in Khandelwal Industrial Group, which is now a multi-activity and multi-locational organization, having diversified product portfolio.

## 1954 AUTOMOTIVE PRODUCTS COMPANY

Providing Rubber products for:

- Automotive Applications.
  - Sheeting and Mats for various end uses.
  - Products for the Shoe Industry.
- 

## 1974 Indian Rubber Products

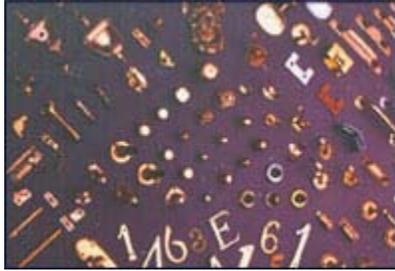

Manufacturing Custom Moldings and Extrusions including:

- OEM & Rubber to Metal bonded parts.

- Railway Components
- Oil Field Exploration Products
- High Endurance Diaphragms,
- Liners Sheets Flooring and Mats

---

1975 *Khandelwal Industrial Enterprises*

making decorative Brass Builder's Hardware for Domestic & Commercial and renovators including:

- Lever Sets.
- Cabinet Hardware
- Door and Window Hardware
- Commercial Hardware

---

1996 **KIE Engineering (P) Ltd.**

Supplying Ferrous and Non Ferrous casting and Machined Components for Industrial & Automotive applications:

- Gray Iron, S.G. Iron & Non Ferrous Castings
- Automotive Components: Liners, Pistons etc.
- Compressor & Valve pump Parts.
  
- CNC precision machined components.
