

About Us

Kavita Enterprise established in the year 1990 with very little capital investment as a Small Scale Industry. Initially, the product range also was hardly of some items. In the span of years, the business has been developed manifold and at present the product range consists of:

- Complete Range of Precision Turned Brass Components.
- Brass Sanitary Parts, Pipe Fittings, Hose Fittings.
- Brass Fasteners i.e. Nuts, Washers, Screws, Anchors.
- Brass LPG Stave Parts i.e. Brass Cock, Brass Spindle, Brass 1BA Jet
- Communication & Instruments Parts.
- Brass Electrical And Electronics Parts.
- Brass Mixer Parts.
- Brass Water Heater Parts.
- Brass Transformer Parts.
- Switches Parts.

To supply quality material to the customers is our main motto. This process starts right from using quality raw material to produce final quality products. Besides, we always care to manufacture entire products which range 3mm to 100mm with accurate measurement and excellent finishing. Most competitive rates, good packing, timely supply of the material and prompt & personal attention to the customers are our most concerned matter.

We, at **Kavita Enterprise**, have achieved record production that too without any rejection with the help of qualified supervisors, dedicated labour force, state-of –the art machineries and measuring instruments. Rigorous quality control right beginning from buying raw material to every stage of production and finally up to packing of the material has put us in No. 1 position in the market.

During the years of business, large number of utmost satisfied customers including limited and private limited companies is our main asset.

LIST OF MACHINERIES:

- Troube Machine
- Drilling Machine
- Special Purpose Drilling Machine
- Draw Bantches (Wire Drawing Machine)
- Threading Machine
- Milling Machine
- Cutting Machine
- Hand And Power Press
- Polishing And Deburring Machine
- Wire Dras Machines
- Wire Cutting Machines
- Automatic Cutting / Slotting Machines
- Turning Machines
- Drills
- Trobe Machines
- 20 - 15 - 5 - Tone Press Machines
- Lathes
- Headers for Screws

PLATING FACILITIES :

- Nickel Plating / Copper Plating / Chrome Plating
- Silver / Gold/ Tin / Brass Plating
- Yellow Passivated, Blue Zinc

Robust Infrastructure

- A strong infrastructural base is behind our tremendous success in this field. It is the cumulative effort of qualified supervisors, dedicated labour force, state-of-the art machineries and measuring instruments that has helped us to carve a niche in this field. This has helped us in garnering a huge clientele which includes many private limited companies.

Name of C.E.O	: Mr. G.P Patel
Establishment Year	: 1990
Primary Business Type	: Manufacturer and Exporter
No. of Employees	: 25-50
Annual Sales (In Rs.)	: 95 lac
Market We Cover	: European Countries

Since beginning, it is our primary concern to concentrate on quality of the material. To achieve this goal, rigorous quality check/control is carried out right beginning from purchasing the raw material to each & every stage of production and up to packing of the material. This leads us to almost zero rejection and ultimately utmost satisfaction to the customers.

To continue this process, we own state of the art machineries which produce accurate material without any defect. Apart from this, latest measuring instruments like Calipers, Electronic Vernier, Micro Meter and all types of standard gauges are back bone to our quality products.

In the occasion of specific requirement by the customer, we stress to purchase special nature raw material and accordingly quality goods are supplied to the customers.

OUR POLICY:

- Inspection of row material chemical properties like copper, zinc and other elements.
- Inspection of row material physical properties like tensile, elongation, izod and hardness.
- Statical process control through venier caliper, micro meter, thread pitch micro meter, go and not go ring gauges and plug gauges.
- Stick visual inspection.
- Final inspection at the time of shipment with statical measuring technologies like, mean standard deviance etc..

OUR CAPABILITY:

- Vernier Callipers
- Micro Meters
- Thread Pitch Micro Meters.
- Ring and Plug Gauges.
- Radius Gauges.
- Pin Gauges
- Special Purpose Gauges to Control Critical Dimensions.
