

About Us

METAL PLANTS engineers, designs and manufactures of wide range of Process Equipments & Turnkey Systems for Chemical & Petrochemical, Aromatic & Flavor, Bulk Drug & Pharmaceutical, Food & Dairy, Cosmetic & Perfumery etc industries.

Established in the year 1970, **METAL PLANTS** serves a national & global marketplace of process industries. At METAL PLANTS quality engineering, designing and manufacturing are customized to meet individual specifications and comply with internationally recognized codes and standards, including ASME, TEMA, BS & BIS.

METAL PLANTS cover 400 sq mtrs facilities complete with fabrication, machining, finishing, cranes etc to enable to manufacture and deliver medium sized, complex components and systems. Simple equipments to complex process systems; our experience of over three decades is employed in building the system to suit your needs and budget. Our fabrication experience covers standard and low temperature Carbon steels, Stainless steels, Exotic materials like Super Duplex Stainless Steel, Monel, Inconel, Hastelloy, etc. The plant is strategically located close to major airports, highways, railroads & shipping ports.

Traditional yet innovative, **METAL PLANTS** have forged a standard based upon proven design, engineering, performance, dependability and quality for process industry customers. **METAL PLANTS** innovative team of industry professionals keep constant pace with technological developments and industry changes. We provide a single source for consultation, planning, coordination, custom design, engineering and manufacturing of dependable process equipments and systems that are competitively priced.

Our product performance extends to after-sale service and provides smooth, hassle-free installation, start-up, and commissioning you can depend on.

METAL PLANTS – in touch with the needs of the process industries.

The growing demand for highly productive and cost effective process equipment has been the driving force in **METAL PLANTS** goal to meet our customers' needs for on time delivery and within budget equipment and services. To meet this objective, **METAL PLANTS** has the skilled staff and necessary equipment to get the job done right.

Our fabrication expertise ranges from Standard & Low temperature Carbon steels, Stainless steels, Exotic material like Super Duplex Stainless Steel, Monel, Inconel, Hastelloy, etc to Clad material bonding.

The existing manufacturing plant can accommodate units up to 4000 mm diameter, by 28000 mm in length. Two overhead cranes with a total capacity of 10 tons in the factory and large doors facilitate the construction of units up to 7.5 tons. The existing manufacturing plant is being augmented with ultramodern facility on an area of 2400 Sq Mtrs at Additional MIDC, Ambernath, Thane, about 40 km from the present location.

METAL PLANTS name has long been associated with functional design and performance. Every unit or system **METAL PLANTS** fabricates is tested to exceed industry standards and to ensure a long, dependable, and trouble free operation. Our quality assurance programs benefits our customers in knowing that we design and manufacture equipment of uncompromising quality and exceptional service.

Whether your requirement is for a pre-production unit, high production system or large-scale project, **METAL PLANTS** experience can help with your process equipment needs. Contact us by email, facsimile or phone, we will analyze your problem and recommend the type of equipment to best suit your process equipment requirements.
