

## ABOUT US

---

Incepted in the year **2005**, **Capro Valves & Controls Pvt. Ltd.** is engaged in **manufacturing and supplying of fully automatic and manual valves, which are used in various industries like chemical, petrochemical, refineries, sugar factories, oil refineries.** Our company started under the able guidance of **Mr. Ashish More**, the director of the company. He possess rich industry expertise in the allied field. With the efforts of our workforce, we consistently strive to foster our innovative capabilities and endeavor to be acknowledged as the most reliable business entity. Supported by an in-house design facility, **we can capably tailor our products as per the prototypes and specifications provided by our clients.**

### Profile

Our array of products is a perfect **blend of technology, innovation and design, which serves the critical requirements of our customers.** To enable our customer, experience our products, **bwe also provide free sampling of our valves.** Our adherence towards quality, help us in acquiring the satisfaction of our customers. After creating a strong foothold in the domestic arena, **we are now venturing into exports.**

### Products Portfolio

**Manufactured by using qualitative materials** like cast carbon steel (ASTM A-216 Gr WCB), forged carbon steel (ASTM-A-105), S.S. 304 (CF8)/ 316 (CF8M), cast iron gun metal alloy steel and aluminium. **Our assortment of products** comprises of **Gate Valve, Globe Valve, Non Return Valve, Control Valve, Pneumatic Valves, Ball Valve / Butterfly Valve / Strainer, Bellow Sealed Valves and Special Service Valves.**

These are widely reckoned for the following salient features:

- Extreme ruggedness
- Crack free
- Rust resistant
- Leak-proof
- Easy operation
- Low maintenance
- Consistent performance

Available in sizes ranging from ½" to 24" and classes like 150#, 300#, 600#, 900#, 1500#, **our products can tailored to suit the requirements of our clients.** We also **manufacture other products like Control Valve, Ball Valve with Electric Actuator, Safety Relief Valve, Pressure Reducing Valve, Needle Valve, Fully Automatic Valves, Motorized Valves, Plug Valves, Needle Valves, Pneumatic Actuator and Cylinder, Sugar Valve, Pipe Fittings & Flanges, Valve Strainers, Plug Valves, Safety Valves, Diaphragms Valves, Solenoid valves, Manual Valves, Check Valves and PRV (Pressure Regulating Valves).**

### Quality Compliance

To maintain the highest quality standards of our products, **we conduct rigorous quality checks on our products during the production process and before their dispatch.** We even test the quality of raw materials and procure them from reliable and well established vendors. To ensure the flawlessness of our products, we have a **dedicated team of quality analysts**, which conducts various tests using equipments and processes like:

- Hydraulic testing machines
- Compressor testing machines
- Cycle testing machines
- In-house inspections
- Laboratory test
- Chromatic test
- Hydraulic test

All the finished valves are tested on the following parameters:

- Resistance to corrosion
- Surface finishing
- Performance
- Durability
