We Spin, Deep Draw, Reverse Draw, Ironing, Impact Extrusion, Cold Forging, Melting, Casting, Hot & Cold Rolling, Punching, Annealing, Designing Tools, Development of Components and Production. Aluminium is Lightweight, Durable, Ductile & Corrosion-resistant.

ESTABLISHED IN 1976

Impact Metals Ltd has completed 40 years of service to farming community, by offering seamless Aluminium Bottles for packing liquid pesticides. The company is in the good books of global players like Syngenta, Aventis, Bayer, BASF to name a few, with its ISO-9002 accreditation. The sales of this product stood at Rs.30 Crores and now poised to reach Rs.50 Crores per year with the re-location of plant of Bhubaneswar to Baroda, the heart of Chemical Zone. The Bottles are exported to Middle East, South East and Europe previously. Now the company is making all the efforts to export these bottles into USA and other markets consolidating its position as leader in this particular segment of rigid containers, capacitor housings and non-ferrous cold forgings. Impact Metals Limited (Hyderabad), Impact Metal Parts (P) Ltd (Baroda) are involved in making Aluminium Containers and Cold Forgings.

The Group has diverted into Marine Biology, with an investment into prawn hatchery for production of 20 million post larve of Tiger Prawn. Unshaken by the traumatic experiences of the Industry, the hatchery has put in steady growth from 1995 to till date, winning the confidence of Aquaculture Farmers and now producing more than 200 million seed. The rapport developed with farmers is encouraging the management in proposing horizontal expansion with atleast another two hatcheries and vertical growth in going for feed mill, culture, processing and export of shrimp. The hatchery occupies front rank among 150 hatcheries in the east coast of India. Our hatchery has the distinction being the first to obtain ISO-9002. Golden Aqua Farms & Exporters Pvt Ltd in Visakhapatnam is the company of the group in Sea Food Activity.
