

About us

V-Tech Engineering was established in the year 2010 as a manufacturer, supplier, and exporter of fluid handling devices like different type valves, different type coarse filtering devices, different type flanges, orifice plate assembly, flow glass, sight flow indicators, gaskets which is widely used in all process industries. Our offerings are known for their optimal tensile strength, resistance to corrosion, durability and ability to function under extreme temperature and pressure conditions. Our products mostly find usage in all process related industries like chemicals, pharmaceuticals, petrochemicals, paint, pulp and paper, food processing, ceramics, beverages, marine etc.

Our products are manufactured by using tested material and components that are sourced directly from the certified vendors. Apart from this, we utilize sophisticated designing patterns to ensure high operational functionality and long life of the products. Our products are widely accredited for their high tensile strength, durability, reliability, stability, robust construction and these are available in various designs and sizes. Orders are executed within stipulated time as per delivery terms.

Our infrastructure offers large space to effectively carry out all the functions involved in manufacturing processes. Required machineries and testing equipments are installed in our works. It is handled by experienced and self-disciplined staffs who make effective use of these available resources. Our professionals work in close coordination and timely execute every task assigned to them. Owing to their continuous support, flexibility and hard work, we have been able to offer qualitative and reliable products to our clients.

Aim

Customer should be satisfied with our products, services and reasonable prices offered to our products.

Quality Assurance

Quality has always been our strong point as we are quality driven organization. We always assure our customers with better quality products. All the items dispatched from our works adhere to specified quality norms which is ensured by our quality engineers.

Time Delivery

Ever since inception, we have always striven hard to deliver our orders within stipulated time as per delivery term. To achieve this goal, we adhere to a flexible production line and have a reliable supply chain network that enable us to fulfill bulk and immediate requirements of our clients.
