

About Us

Horiaki India Private Limited was established in the year 1998 as with the vision of offering superior quality rubber to metal bonded products & Bellows Silicon Parts in India as well as international market. In the past 17 years of its existence, the company has come long way and has been able to established itself as a recognized brand in the market. Under the able mentorship of our founder and Managing director Mr.K.R.Rajendran; the company is scaling new heights of success in every field, be it in terms of diversification of product line, development and research of new and innovative products or meeting rising needs of our esteemed clients. We are certified with ISO 9001:2008 and we are marching toward the certification TS 16949: 2009 and are aiming to establish Horiaki as a one stop shop for all rubber, rubber to metal bonded products & plastic related products.

[Horiaki](#), as the leading manufacturers,importers and supplier of rubber parts win the good will and trust of several industrial corporations in Germany,UK,Europe by its best products.

Infrastructure

One of the key pillars on which Horiaki India Private Limited has been able to base its success upon is the advanced infrastructural facilities. Setup across 45000 sq.ft of area in Tambaram, Chennai; our manufacturing unit is equipped with advanced machinery and latest equipments that helps us to produce the best rubber & rubber to metal bonded products in India. With machinery like Fully Automatic Rubber Injection Molding Machine, Compression Molding machine & Extrusion machine, the products that we offer have perfect fit and finish and are ideal to be used to in different industrial applications. In addition to this, we also regularly update our manufacturing facility with latest technology and equipment to ensure that our clients get the best products.

Quality

We at, Horiaki India Private Limited believe that quality of any product determines its future and therefore place it above all other factors as far as our product catalogue goes. We use industrial grade rubber raw materials like Natural rubber, NBR, HNBR, EPDM, Silicone, Fluorosilicone, Neoprene, FFKM, FKM, Polyurethane, Nylon, PP, UHMWPE in the production process to ensure that the final product is best in terms of quality. Our in-house laboratory can test the Physical Properties of Rubber, Rheological behavior, Compressive Load strength of Metal to Rubber Bonded Products, Accelerated Heat Ageing & Oil immersion tests and other similar factors to ensure that our products meet ASTM standards & customer specifications. Furthermore, we have also implemented an extensive quality check mechanism at every stage of manufacturing assembly to make sure that every product that leaves our factory premises is free from any flaws.

Clientele

Since 1998, we have been able to win good will and trust of several major industrial corporations from across the globe, which trust our products. Our clientele has helped us emerge as the best in the business by helping us develop better products that meet their evolving needs and requirements. Our clients hail from different industrial backgrounds such as Oil & Gas industries, Automotive & Non-Automotive industries as well as other industrial processes. Some of our major customers are GE Oil & Gas, GE Bentley-USA, GMT Benelux, Desser Valves, Project Control Germany, Dietrich Teigler Nachf, JCB, Huntingdon Fusion Techniques(HFT), Thunderbike Harley-Davidson etc. As our clientele shows, we are listed among the most popular drain testing plugs exporters from India.
