

Company Profile

Since its inception in 1993, Insmart systems has grown into a market leader catering to the diverse needs of the industry. The company has redefined the way Sample Preparation machines are designed. It has gained widespread acceptance and is recognized as the most reliable supplier of sample preparation equipments in the vast and rapidly expanding Indian market. Today, Insmart Systems enjoys a 95% market share. Our consumers include some the most reputed defense and research labs of the country. Our emphasis on the research and development front has enabled us to provide them with the most innovative products and processes.

As one of the most progressive companies in this area we use our expertise in not only designing the most impressive equipment but also in educating our customers in their utilization ,so they can derive maximum benefits from our products. Apart from designing our own line of products we also undertake repair and maintenance of machines built by other international players in the area of sample preparation equipment. By synergizing our knowledge in the domains of Sample Preparation Equipment and Automation we promise to deliver the most cutting edge and 'never-seen-before' equipment in the near future.

An experience of fifteen years has given us a solid foundation and depth in the area of design. Today we proudly showcase our manufacturing unit at Hyderabad, Andhra Pradesh.

Our facility boasts of the most sophisticated equipments and our efficient design methodologies helps meet even most stringent deadlines of our customers. Our dedicated employees backed by a committed management team enable us to deliver the best after sales services.

We at Insmart Systems are driven to give you the best quality products that not only comply with the international standards but are also economical and innovative. It is our ideology to provide our customers with the most friendly technology thus saving them from a steep learning curve ,this is something that other players in this field have failed to comprehend ,our company though always ready to deliver the most sophisticated systems keeps this in mind and as the market matures we deliver it to the market. This progression of technology is clearly the evident from our successive product releases. Our research and development efforts have helped us evolve the machines for sample preparation equipment from a state of manual to semi-automatic and today we are on the threshold of transforming them to completely automatic systems - another first from our company.
