

## About Us

As economies grow, the thirst for technology-driven engineering solutions becomes more demanding. We have onset three decades ago a gateway for migrating newer construction technologies and products that has brought a rapid change in the Indian construction scenario. We will continue to augment innovations in the construction industry and support our customers with critical care”.

Advanced Construction Technologies Pvt. Ltd., is a leader in providing Construction Solutions. We are acknowledged for successfully testing and introducing new products and innovative service solutions in the country. Our consistent migrations of products and methodologies have brought a phenomenal change in the construction industry.

**ACT also offers host of services that include** Repair and Retrofitting of structures using Fibrwrap Composite Systems

**Sale of construction Equipment** Light Equipment – Plate Compactors, Jumping Rammers, Floor Saws, Hand Drills, etc

**Controlled Demolition and Dismantling of structures using** Heavy Equipment – Excavators, Loaders, Double-Drum Rollers, Bobcat Skid Steer, etc

**Silent Demolition Techniques** Specialized Demolition Equipment – High Reach Booms, High Reach Arms, Piping Kit Attachments for excavators

**Failure Investigation**

**Disaster Management** Demolition Attachments –Hydraulic Crushers, Breakers, Drum Cutters, Grapples, Hydraulic Pulverizers, etc

Our Strength

Advanced Construction Technologies is proud of its core team who are self motivated, professionally trained, technically qualified and adequately experienced. Advanced Construction Technologies sustenance in the industry is fully backed by this qualified team who through their dedication and commitment has shown immense promise in executing projects and servicing clientele.

<b>Trainings &amp; Workshops:</b>	<b>Building Customer Relationships:</b>	<b>Key Benefits to the Employees:</b>
CEDIMA - in Germany	Service Camps	Fully covered Insurance
DEUTZ - in Singapore	Technology Awareness Programs	Sponsorship for Technical Qualification
PERKINS -in India	Product Launches	Training on Communication Skills
VOLVO - in India, Singapore, Korea	On Site Equipment Training	Systems Training
	Customer Meets	Recognition of Individual Skills - Certifications, Awards, Citations and many more
	In House - Product Presentation, Customer Support Agreement	

ACT's professional achievements:

Pioneered the art of Diamond Cutting Technology in India in 1994 and implemented it several complicated contracts related to selective and controlled dismantling of structures. Now, humbly proclaims to be the leader, paving way for many new entrants.

Implemented Implosion Technology in collaboration with Controlled Demolition Inc. USA, in India in 1997.

Introduced Direct Burial of Cables – DBC a new technology, which completely harnesses the power of Diamond Cutting Technology, used for laying OFCs for Tele communication service provides, In-house Network Connections etc.

Introduced DBC and DBD technology to Telecom company of Kingdom of Saudi Arabia.

As technology partner worked with Dicotech LLC, a retrofitting specialists company in Dubai, United Arab Emirates.

#### **Our Resources:**

ACT offers customized engineering solutions with modern tools and techniques with maximum speed and efficiency with the following resources:

A range of high capacity diamond cutting machines

Well equipped workshop with Mobile Servicing Van

Skilled and qualified technical team trained in Germany and Singapore

Qualified and experienced office supporting and administrative staff
