

About us

Veljan Hydrair Limited, established in the year 1965, is a pioneering FLUID POWER company in India and a leader in its own right.

Veljan has a wealth of experience in developing and manufacturing a wide range of Pneumatic and Hydraulic products, components and systems for over five decades now at its various manufacturing plants located in and near Hyderabad, India. These plants are manned with modern, advanced and flexible manufacturing facilities and systems which are supported by young and skilled human resources.

Veljan has the expertise to provide complete solutions in all applications such as Ship building, Energy, Mobile and Industrial segments. Development, enhancement and expansion of the existing product range is an ongoing process to meet the dynamic market needs.

Veljan's group company Veljan Denison Limited manufactures Pumps, Motors, Valves and custom-built Power systems / Manifold blocks.

(Denison Hydraulics India Limited, was set up originally in 1974 under technical & financial collaboration with Denison division of Abex Corpn. USA. When Hagglunds of Sweden acquired Denison Hydraulics from Abex Industries this Indian company too went to its fold to become Hagglunds Denison India Limited. When Hagglunds divested the Denison Hydraulics part in 1994, the Indian company decided to part ways and since then it has been on its own and without having any relationship with its erstwhile collaborators. This company has been renamed as Veljan Denison Limited in the year 2010)
