

About us

We, AEW Group, are a prominent Construction Equipment Manufacturing Companies of India based in Hyderabad and also a leading exporter of Hot Mix and Wet Mix Plants. AEW Group is a family owned and operated business. Continuing on a philosophy that has spanned two generations, we treat all of the customers an integral part of the family. At AEW Group, we just don't sell equipment, we provide solutions. We just don't make clients, we make friends. Our commitment to offering a complete range of efficient road construction equipment has got only stronger in the decade of industry presence since our inception in 2000.

ince the year 2000, we at AEW Group are in the business of manufacturing road construction equipment at Hyderabad, India. We are the ISO 9001:2008 (TUV) certified company, having cutting-edge technology to deliver equipment through engineering excellence. We have manufacturing facilities to deliver road equipment such as hot mix plants, wet mix macadam plants, bitumen sprayers, road cleaning equipment, paver finishers, and all that is required for road construction. Our test lab is well-equipped with latest sophisticated testing instruments to deliver quality equipment.

We have set various benchmarks in manufacturing excellence.

- ★We have qualified, experienced engineers and efficient workers in our ranks.
- ★Pursuing excellence from almost two decades in road machines.

★Total Quality Management is our motto, constant improvement in machines is our mission.

Our commitment and will to deliver the best have put us on International map, besides India. Our Road Construction machines are tested and operated on the toughest and extreme conditions with greater success.
