

About Us

Jaydeep Engineering Co. was established in the year 1981 by an extremely hard working and honest second generation businessman Shri Nautamlal C. Shah. The company started dealing in engineering goods such as diesel engines, electric motors, pump sets, control equipments, spares. "Customer First" has been our guiding business principal from day one. In fact when We look back We realize that most of Shri. N. C. Shah's regular customers were his loyal and good friends. People in the business community make a friend and an acquaintance into a customer, here it was the other way round, most of his good friends had started off as his customers.
