

About Us

SUPERFLO has over the years added a wide range of products to keep pace with Industrial needs in developing innovative solutions for unique applications.

SUPERFLO through its overseas associations also provides state of art filtration solutions with Elementless Equipment, Automatic in operation, Fine Filtration down to 0.2 microns with Backwashing facility and 100% recovery of cake for certain applications etc.

Range includes single modular filters or modular filtration systems all the way across the filtration spectrum handling your filtration needs from the very coarse to the particulate in the micro filtration range. Company supplies both Standard off the Shelf Filters and Custom Designed solutions.

Experience over 3 decades in Filtration & Separation to your service.

Major Clients

- Chemicals, Dyes & Paints
- Refineries & Petrochemicals
- Pharmaceuticals, Healthcare, Personal Care products
- Food, Beverages & Distilleries
- Man Made Fibre Industry
- Paper Industry
- Steel Plants, Rolling Mills, Pellet / Sponge Iron Plants
- Cables & Wires
- Power Plants & Power Plant Equipment Mfg. Cos
- Machine Tool Industry
- Fertilizer Plants
- Heavy Engineering Industry
- Engineering Package Contractors, Consultants, etc
- Automotive & Car Wash
- Water Treatment & HVAC

Aim

- Superflo is committed to filtration and filtration is our business
- Regular upgradation to latest technology
- Consistency in quality
- Minimum maintenance
- Better efficiency
- Earlier Paybacks

Capabilities

Engineered solutions for critical applications and standard filters for regular applications made Superflo known in the country and outside. Technical capabilities and committed team ensures good products of required quality.

Superflo offers you custom engineered solutions across the filtration spectrum – from the very coarse to the fine micron level using elements made out of Metal Wire Mesh, Sintered SS, Fabric, Wedge Wire etc.

The most commonly used “Y” Strainer, Simplex Filters, Duplex Filters or Quadruplex Filters for continuous operation, Automatic Online Cleaning Filters / Strainers are all part of the Superflo range.

An ISO 9001 – 2008 certified company, can supply you products to IS 2825, ASME VIII or to PED (97/23/EC) etc.

Major Activities

- Providing filtration solutions for liquid and gases within the range of products
- Application Engineering, Design, Detail Engineering, Manufacturing and Testing of Industrial Filters and Strainers
- Trading of “Industrial Filtration Equipment” from overseas associates and other appropriate ones
- Marketing representation of overseas companies in the field of Filtration & Separation

Possibilities

Marketing approach and efforts have helped introduce state of the art filtration technologies of overseas partners / associates within the country.

Like continuous through put solutions of micro filtration employing ceramic cross flow membranes manufactured by Mantec Technical Ceramics Limited, United Kingdom.

Compact modular solutions offering single stage filtration instead of multi stage systems of settling tanks, sand bed filters, flash mixers and charcoal filters etc.

Superflo with its expanding outreach is looking at partnership opportunities to supply filters of its own / clients design to International Standards. The services of its countrywide marketing network are available to introduce industrial equipment in India, one of the fastest growing industrial economies today.
