

## About us

Sepack india pvt ltd, has its legacy from sevana group - an organization creating packaging masterpieces for the last 3 decades. All started by a humble beginning in a small village “kizhakkambalam” in kerala by a group of technocrats; influenced the packaging of commoner in india; sepack has become one of the well-known names in packaging with pan india presence and internationally accepted products and services.

Commitment to innovation, transparency, customer satisfaction, continual improvement, commitment to society and environment are our core values. We always believe in customer retention.

We offer end of the line packaging machines and systems including primary and secondary packaging machines, weighing, bagging systems, conveying and material handling systems.

Packaging plays a very important role in sustaining the product quality; avoid perish ability, improving market appeal and many more. Sevana is a pioneer packaging machinery manufacturer of india. In a situation when millions go starving in the world, sevana's efforts could save tons of food material from perishing, sustain product quality and improve marketability, i am really proud to be instrumental in initiating this venture. Being an nitw alumni, i acquired the ability and strength to be the promoter of this venture.
