

About Us

Incepted in Ludhiana, Punjab, **Devansh Steels** is a large-scale company with specialization in manufacturing and dealing of variety of fasteners. Our company is counted among the biggest **high tensile fastener** distributing center throughout India. With our constant effort and dedication since all these years, for development, we have setup contemporary facilities in order to produce impeccable quality Hexagon Head Bolt, Nuts, Threaded Rods / Bars, Washers, Roofing Bolts for Coal Mines, high quality Anchor Fasteners, Railways Fasteners, Transmission line Fasteners, Industrial Fasteners and wind turbine fasteners etc.

We have expertise in **manufacturing high strength bolts** having large hexagon head for steel structures, electro-galvanized standard components, hot galvanizing standard components, high-strength bolts and nuts of grade 6.8, grade 8.8, grade 10.9 and grade 12.9, double-threaded bolts, foundation bolts, full thread screws, plain cushions, high quality fasteners as per ANSI, DIN and BS standards and special-shaped components having varied lengths and specifications of M 8 to M 68. Our company has an **in-house designing and manufacturing** infrastructural facility further supported by excellent modern technology and equipments with dedicated and diligent workforce. All these put together aids us in carrying out our various processes right from designing the concept, manufacturing products, quality and specifications verification phases, until the final delivery of the promised fastener type to the customers.

We have gained a great and reliable reputation within **fastener industry** by providing high quality products and prompt and considerate services for longer period of time. Our products are widely acclaimed throughout the country and are also exported to several countries and regions, like the Middle East, Southeast Asia, Europe and America.

Strict Quality assurance systems are followed in all departments and Total Quality Management is applied to streamline and all procedures and practices in operation to achieve the highest standard of efficiency. Continuous efforts are being made for improvement of materials technology and equipments to ensure best quality products at the most affordable prices.
