

About us

Benzear equipments india (p) ltd was established in the year 1997, as an organization dedicated and specialized in designing, developing and manufacturing of engineering equipment's such as special purpose machinery and in-situ maintenance machines for servicing all type of diesel engines. A humble beginning with 500 sq. Ft. Building and sub-contracting have grown into firm with 2 acres of land with construction area of 5500 sq. Ft. Supported by designing, machine shop with all basic machineries, fabrication shop, stores, quality inspection, assembling, testing and delivery sections. Where most of the process is done in house and diversified its manufacture also in automobile garage equipments.

In recent years it is no secret that maintenance assurance helps to reduce cost in all field of industries. However this is the only reason why benzear has established itself as an indispensable technique service provider for any critical components today. Its benefits are particularly obvious when it comes in providing solvable repairing services to match the o.e.m. All these machines are developed by studying and experiencing the day-to-day problem faced in maintenance of diesel engine and garage equipments.

Today benzear is one of the growing manufacturing company. Riding on the twin commitment of quality and service, the company is today positioned to delivery the machineries for clients in india and abroad. It has the excellent infrastructure, equipment with machineries, which are capable to manufacture products meeting international standards. Few of our spm's are filed under indian pattern act
