

About Us

Farm Equipments Corporation was started in the year 2003 operating from Chennai, Tamilnadu. It was started as trading company and later expanded vertically as well as horizontally to meet the market demands. It is a leading firm engaged in manufacturing and trading of tractor driven agricultural machineries and its spare parts in India. The key areas of expertise involves in the manufacturing and trading of Land Preparation Machineries, Field Maintenance Machineries and Handling Equipments. The company has got more than 500 strong dealers / distributors network throughout India to sell its products. We keep building our dealers network to become a strong player in our segment.

Needless to mention that Farm Equipments corporation is the 1st company in India to explore the possibilities of Importing and selling blades for Rotary Tiller (Rotavator) at almost the cost of local blades. The blades with the brand STAR was 1st Introduced by this company in 2003. Till now this STAR brand blades are considered to be the best in India in terms of life of the blades when compared to any other blades that are available in India. STAR blades give more than 30% more life in comparison with other popular brand blades available in India. This Logo embossed in the blades ensures the original Italian blades.

We have almost all the models of blades that are required in the Indian market. Apart from the above Farm Equipments corporation is also involved in trading of PTO Drive Shafts, Power tiller blades Wet & dry type, (Both Single Hole and double Hole) and paddy twister type blades. Above all it also manufactures and supplies all kinds of spare parts for the Rotavator that are available in the market.

Under the leadership of the Promoter of this company Mr. L.Edward Joseph who has got a rich experience of 25 years in the field of agriculture, Farm Equipments corporation is committed to supply its customers a quality products. Farm Equipments corporation is also interested to introduce new and innovative mechanised agriculture products in the field of agriculture in the future.
