

# Profile

Our organization, Vraj Industries, commenced its operations in the year 2005. Established as a manufacturer, supplier and exporter of industrial fasteners, machine components and ready-made hardware, today we are a renowned name in the industry with clients spread in all parts of the globe. With prime attention on delivering flawless products and assisting our customers with reliable and effective services, we continue to grow and achieve even more in the future. Our products are widely used by the clients in automobile, engineering, heavy machining and other industries.

With the help of our in-house quality testing lab, we keep a strict vigilance on the entire production process and make sure that no defective piece is tested & accepted as 'OK'. Our R & D lab helps us carry out intensive researches for the betterment of the products and services. With our ultimate aim as "customer delight", we strive to offer finest quality fasteners, machine components & hardware at industry leading prices. Supported by highly advanced infrastructure and trained, dynamic & resourceful team, we are able to achieve the objectives of Reliability, Efficiency and Economy, in both, our products & services. We supply our products to the clients based in Indian Subcontinent, East Asia, Middle East and South East Asia.

The tremendous success and fame that we have earned as one of the most reliable manufacturers and exporters of the industry, is the result of focused approach and efforts of our mentor, Mr. Pankaj Mehta & Mr. Saurabh Gandhi. Our positive attitude and business skills have helped us in maintaining the team spirit and dedicating our efforts towards the completion of every assignment on time.

## Product Portfolio

We introduce ourselves as one of the eminent manufacturers, suppliers and exporters of a wide range of industrial fasteners, machine components and ready-made hardware. Made in compliance with the set industry norms, our range comprises bolts, nuts, washers, stud, studs, fasteners, clamps, rivets, machine components and ready-made hardware. All of these are manufactured utilizing high quality metals and alloys including, various grades of steel, brass, nickel and others.

Silent Features:

- Precise design
- Rigid construction
- Dimensional accuracy
- High tensile strength
- Corrosion & abrasion resistance

Owing to the above mentioned features and attributes, our range is highly appreciated by both national & international clients. Further, the clients utilize our products for in various industries including automotive, engineering, heavy machinery and others.

## **Our Team**

We have recruited a team of highly qualified and skilled professionals, all of whom possess practical training and years of experience. These individuals devote their knowledge and skills towards the betterment of our product line and ensure that the clients are provided with most satisfactory solutions. Our team comprises highly proficient and dedicated staff, which is ever-ready to understand and resolve the clients' queries. The experts utilize the available resources and production facilities fully in order to fulfill existing and emerging demands of the market and the clients adequately.

Our team operates with the help of the following team members:

- Engineers
- Technicians
- Quality controllers
- Research associates
- Warehousing personnel

## **Quality Assurance**

Engineering a range of world class industrial fasteners, machine components and ready-made hardware, we ensure that only flawless products are allowed to move out of the organization, after a rigorous assessment of their quality. With our strict quality control measures, we keep a close vigil on the product development process, right from the stage of procurement of raw material to the final dispatch of the ready orders.

Under the able supervision of our expert quality inspectors, we stringently test the finished products on various parameters including:

- |                        |                             |
|------------------------|-----------------------------|
| • Hardness             | • Proof Load                |
| • Wedge Load           | • Tensile strength          |
| • Head Soundness       | • Elongation Yield Strength |
| • Dimensional accuracy | • Precision in design       |

All the tests are conducted using latest Ring and Plug Gauges, Micrometers, Vernier Calipers & Slip Gauges. These gauges are regularly checked, calibrated and approved by different trusted agencies.

## **Our Infrastructure**

Located in Pune (Maharashtra), our infrastructure is spread on an expansive area. Equipped with state-of-the-art-machinery and supported by diligent professionals, our unit is segregated into the production unit, quality control unit, R&D unit and the warehouse. The manufacturing unit has massive installation capacity and is installed with various high end machines that help in producing a flawless range and enable us to offer customization facility to our valued clients.

Following machines are used at our manufacturing unit:

- Cold Forging
- Hydraulic rolling
- Welding machine
- Molding machine etc
- Straight Cutting
- Drilling machine
- Lathe machine

Our quality control unit helps us to keep a check on the quality of both, raw material and finished products. Further, our R & D unit helps us to design latest versions of the products and satisfy the clients satisfactorily.

## **Research and Development**

Our organization looks forward to establish itself as one of the prominent firms offering most reliable, cost-effective, innovative and advanced range of industrial fasteners, machine components and readymade hardware. Therefore, we have developed an in-house R & D unit in our organization, which assists us in diversifying & improving the existing product line. Functioning under the supervision of a team of diligent researchers and expert analysts, this unit closely coordinates with the other units and departments and helps to ensure delivery of quality end product and completely satisfactory services. The R & D experts utilize their sound experience in monitoring the market trends and researching new technologies that can be used to develop a product as per the clients' requirements.

## **Client Satisfaction**

Vraj Industries is counted amongst the most reliable names in the industry, when it comes to serving premium quality products and attaining maximum client satisfaction. Our latest technology & vast resources, combined with customer centric approach and pre-planned operating strategies, help us in directing our efforts towards meeting the customers' demands, as per their specifications. With the help of our strong financial base and the unbeaten efforts of our team members, we are able to constantly upgrade our product line. Providing most quality oriented, highly mechanized and constructive solutions to our clients, we are serving clients in and outside India.

Highly content with our timely deliveries and economically priced products, our clients are operating in:

- Indian Subcontinent
- East Asia
- Middle East
- South East Asia

### **Our Strength**

Engaged in manufacturing, supplying and exporting a complete range of industrial fasteners, machine components and ready-made hardware, we continuously look forward for innovation in our range of products. Our team utilizes the high end machinery to constantly develop new products that meet the changing needs of the clients and market.

Following attributes help us in becoming the clients' favorite:

- Prime focus on quality
- Innovative and customizable product line
- Team works towards achieving success in every task
- Pre-planned efforts to achieve maximum profits for the clients
