

COMPANY PROFILE

Sieco Engineers Private Limited, globally well-known as "SIECO", is a well-established firm since 1988. We are an ISO 9001:2008 certified company, that has been offering Concept to Commissioning for Process Plant Equipment on turnkey basis for more than 30 years. The company has a great urge for technology and hence has excelled in maintaining a flawless and proven track record in the field.

Sieco was able to acquire this enviable position not because of luck, but due to the sheer hard work of eminent engineers, highly skilled workforce and dedicated staff members. However, the lion-share of the success goes to our most valuable customers who have constantly kept us on the edge to perform.

Vision serves as the roadmap to the company to know 'where to go' and 'how to get there'.

- Go International: To develop into a top-notch / world-class company for providing quality services in technical consultancy, design, engineering and supply of plant, equipment and project implementation.
- Enable Growth: To facilitate 360 degrees growth in employees, associates and most importantly our customers.
- Enhance Satisfaction: To improve levels of service by providing quality products and consistent services to enhance customer satisfaction through flexibility, innovation and commitment.
- Tailor-made solutions: To provide custom-built, appropriate and sustainable solutions to boost customer profits.
- Guarantee Performance: To guarantee product performance both at Indian as well as International standards.
- Up-to-date: To maintain the current position as pioneers in the field by continuously upgrading technologies and modernizing products to meet the diversified needs of national and international customers.
- Business Ethics: To maintain Professionalism, Integrity and Commitment, at all levels.

Mission declares the purpose of the company and stands as a benchmark to maintain decisions, actions and deeds.

- To deliver high quality services to customers at competitive cost and in time as per the project schedule.
- To make the Promoters, Employees and Stake holders feel proud of the quality products & services.
- To strive hard to provide appropriate technological solutions to customers.
- To meet and exceed the requirements of our customers in design, delivery and after-sales-support.
- To have continuous process improvement strategies and expansion/addition of hi-tech equipment and facilities to ensure the highest quality and cost effective products.

Future Plans to bring in a sync with the changing trends and technologies.

- To expand our business, both in domestic and global markets.
-
- To improve the quality of product by adding modern hi-tech welding and Computer Numerical Controlled/(CNC) machining facilities.
- To expand the working area with material handling facility.
- To install ultra-modern CNC machines to enhance the plant capacity, productivity to ensure consistent high-quality.
- To get Joint Ventures, innovate New Products and get New Customers
- To obtain additional International certification of 'U', 'R' and CE to acquire more customers and hence leading to business growth.
