

The chemical industries revolution scenario in India in the early Eighties was a time of sharp contrasts. On the one hand, there was the great discovery of the will to exert one's resources and abilities, to discover and invent, and substitute imported machinery and industry with indigenous alternatives.

On the other hand, there was a tremendous shortage of entrepreneurs who could adequately meet the needs of industries needing ancillary support such as processing plants, chemical industries, petrochemical industries etc.

Mr. Satpal Singh Channa, a pioneer in the Pumping and Centrifuges industry in Gujarat in the Eighties, blazed a brilliant trail in manufacturing Pumping and Centrifuges equipments for Chemical Industries, Petrochemical Industries, Dyes & Intermediates, Refineries, Process Industries, and Textile Industries etc. From the beginning, Satpal Singh Channa considered problems as opportunities.

And in early stages Mr. Gurpreet Singh Channa also joined the company as marketing head. He developed a network in India and Abroad. He is having a good knowledge of Pumping and Centrifuges.

At a time, when the competition was almost nil, and any obstacle would be limited only by one's own determination, Satpal Singh Channa resolved to break new ground, and be the first at it. Driven with characteristic foresight, and a never-say-die attitude, he did what few could achieve at that time.

J.K. Chemical Pumps - Today

Today, J.K. Chemical Pumps is stalwart in the growing field of Pumping and Centrifuges. Solutions, and all sorts of industrial Pumping and Process applications for chemical industry, pharmaceutical industry etc.

The Company has carved a deep niche in the growing field by— Setting up and optimizing today's state-of-the-art manufacturing facilities.

- Strictly following the principles of quality management system.
- Motivating and mobilizing a well-equipped and trained staff.

Company Aims

The Company ever intends to make the choice and purchase of its Pumps and Centrifuges, a pleasant surprise for its customer in performance, in dependability, and in cost efficiency.

J.K. Chemical Pumps realizes that all these measures, when implemented, translate directly into quality, growth, a satisfied and appreciative clientele, a competitive market presence, and prestige.

As the world has gone well into the millennium, J.K. Chemical Pumps has punctuated the years with its own milestones—a growing list of clients, each of whose own progress is a living testimony and excellence.

The mission and vision of the company is to

- We have obtain ISO Certification And Reinforce Quality.
- To establish in International Market Providing Quality Products as per Clients' Specification.
- Our Products are made from Various Metals like SS304, SS316, Alloy20, 306L, Gunmetal, Bronze, CI etc. (Any metallic products can be manufactured).
- We Supply Materials all Over India to Chemical units, Petrochemical, Pharma units and have developed our reputation as a quality supplier.
- Try to make a new sturdy design according to ISO Standards.
